

INDEX TO VOLUME 130

Alphabetical Table of Contents of Authors

- ABRAMS, PETER A. Alternative models of character displacement and niche shift. 2. Displacement when there is competition for a single resource, 271
- AMAT, JUAN A. Is nest parasitism among ducks advantageous to the host? 454
- ANDERSON, DAVID J. See ROBERT E. RICKLEFS et al.
- ANDERSON, DAVID J., NINA C. STOYAN, and ROBERT E. RICKLEFS. Why are there no viviparous birds? A comment, 941
- ARMSTRONG, TERRY. See TODD W. ARNOLD
- ARNOLD, TODD W., FRANK C. ROHWER, and TERRY ARMSTRONG. Egg viability, nest predation, and the adaptive significance of clutch size in prairie ducks, 643
- BARBOSA, PEDRO, and VERA ABER KRISCHIK. Influence of alkaloids on feeding preference of eastern deciduous forest trees by the gypsy moth *Lymantria dispar*, 53
- BARTON, N. H. See B. CHARLESWORTH
- BROWN, D. BARTHOLOMEW, and R. I. C. HANSELL. Convergence to an evolutionarily stable strategy in the two-policy game, 929
- BROWN, JAMES H., and BRIAN A. MAURER. Evolution of species assemblages: effects of energetic constraints and species dynamics on the diversification of the North American avifauna, 1
- BYRLSKI, PHILLIP V. See JAMES L. PATTON
- BUTLIN, R. K. Species, speciation, and reinforcement, 461
- CHARLESWORTH, B., J. A. COYNE, and N. H. BARTON. The relative rates of evolution of sex chromosomes and autosomes, 113
- CLARK, ANDREW G. A test of multilocus interaction in *Drosophila melanogaster*, 283
- CLEGG, MICHAEL T. Preface, S1. See also KERMIT RITLAND
- COGGINS, KATHY ANN. See P. L. SCHWAGMEYER
- COOKE, F. See R. F. ROCKWELL
- COSTANTINO, R. F. See ALAN HASTINGS
- COYNE, JERRY A. See B. CHARLESWORTH; J. S. JONES
- COYNE, JERRY A., and BRYAN MILSTEAD. Long-distance migration of *Drosophila*. 3. Dispersal of *D. melanogaster* alleles from a Maryland orchard, 70
- CULLIS, C. A. The generation of somatic and heritable variation in response to stress, S62
- DAMUTH, JOHN. See I. LORRAINE HEISLER
- DEANGELIS, D. L., J. A. KITCHELL, and W. M. POST. Reply to Commito, 458
- DEVLIN, B., and A. G. STEPHENSON. Sexual variations among plants of a perfect-flowered species, 199
- DOBSON, ANDREW P. See ANTHONY R. IVES
- DOOLITTLE, W. FORD. The origin and function of intervening sequences in DNA: a review, 915
- DUNBRACK, ROBERT L., and LOUIS A. GIGUÈRE. Adaptive responses to accelerating costs of movement: a bioenergetic basis for the type-III functional response, 147
- ELLNER, STEPHEN. Competition and dormancy: a reanalysis and review, 798
- ESHEL, ILAN. See DAPHNA WEINSHALL
- ESHEL, ILAN, and DAPHNA WEINSHALL. Sexual reproduction and viability of future offspring, 775
- FINDLAY, C. S. See R. F. ROCKWELL
- FORSBERG, JOHAN. See CHRISTER WIKLUND
- FREED, LEONARD A. The long-term pair bond of tropical house wrens: advantage or constraint? 507

- . Prospective infanticide and protection of genetic paternity in tropical house wrens, 948
- FUTUYMA, DOUGLAS J. On the role of species in anagenesis, 465
- GEBER, MONICA A. See MARK A. MCGINLEY
- GENDRON, ROBERT P. Models and mechanisms of frequency-dependent predation, 603
- GETTY, THOMAS. Crypsis, mimicry, and switching: the basic similarity of superficially different analyses, 793
- GIGUÈRE, LOUIS A. See ROBERT L. DUNBRACK
- GOTELLI, NICHOLAS J., and DANIEL SIMBERLOFF. The distribution and abundance of tallgrass prairie plants: a test of the core-satellite hypothesis, 18
- GOULD, JAMES L., and WILLIAM F. TOWNE. Evolution of the dance language, 317
- GUTTMAN, SHELDON I. See MICHAEL A. ROMANO
- HANSELL, R. I. C. See D. BARTHOLOMEW BROWN
- HASTINGS, ALAN, and R. F. COSTANTINO. Cannibalistic egg-larva interactions in *Tribolium*: an explanation for the oscillations in population numbers, 36
- HEISLER, I. LORRAINE, and JOHN DAMUTH. A method for analyzing selection in hierarchically structured populations, 582
- HOLT, ROBERT D., and BURT P. KOTLER. Short-term apparent competition, 412
- HUBBELL, STEPHEN P., and LESLIE K. JOHNSON. Environmental variance in lifetime mating success, mate choice, and sexual selection, 91
- HUSTON, MICHAEL, and THOMAS SMITH. Plant succession: life history and competition, 168
- IMS, ROLF ANKER. Male spacing systems in microtine rodents, 475
- IVES, ANTHONY R., and ANDREW P. DOBSON. Antipredator behavior and the population dynamics of simple predator-prey systems, 431
- JANSON, CHARLES H. Bird consumption of bicolored fruit displays, 788
- JOHNSON, LESLIE K. See STEPHEN P. HUBBELL
- JONES, J. S., JERRY A. COYNE, and LINDA PARTRIDGE. Estimation of the thermal niche of *Drosophila melanogaster* using a temperature-sensitive mutation, 83
- KAREIVA, PETER, and GARRETT ODELL. Swarms of predators exhibit "prey-taxis" if individual predators use area-restricted search, 233
- KARLIN, SAMUEL. See MACDONALD MORRIS
- KARLSSON, BENGT. See CHRISTER WIKLUND
- KIDD, N. A. C., and G. B. LEWIS. Can vertebrate predators regulate their prey? A reply, 448
- KINGSOLVER, JOEL G. Mosquito host choice and the epidemiology of malaria, 811
- KITCHELL, J. A. See D. L. DEANGELIS
- KOTLER, BURT P. See ROBERT D. HOLT
- KRISCHIK, VERA ABER. See PEDRO BARBOSA
- LAMBERT, DAVID M. See HAMISH G. SPENCER
- LAMEY, TIMOTHY C. See P. L. SCHWAGMEYER
- LANDE, RUSSELL. Extinction thresholds in demographic models of territorial populations, 624. See also DOUGLAS W. SCHEMSKE
- LEWIS, G. B. See N. A. C. KIDD
- LIBBY, WILLIAM J. See STEVEN H. STRAUSS
- LIGON, J. DAVID. See PETER B. STACEY
- MASON, PAUL, and STEPHEN I. ROTHSTEIN. Crypsis versus mimicry and the color of shiny cowbird eggs, 161
- MATESSI, CARLO. See MACDONALD MORRIS
- MAURER, BRIAN A. See JAMES H. BROWN
- MAZER, SUSAN J. The quantitative genetics of life history and fitness components in *Raphanus raphanistrum* L. (Brassicaceae): ecological and evolutionary consequences of seed-weight variation, 891
- McARDLE, BRIAN H. See HAMISH G. SPENCER
- MCGINLEY, MARK A., DAVID H. TEMME, and MONICA A. GEGER. Parental investment in offspring in variable environments: theoretical and empirical considerations, 370
- MENGE, BRUCE A., and JOHN P. SUTHERLAND. Community regulation: variation in disturbance, competition, and predation in relation to environmental stress and recruitment, 730

- MILSTEAD, BRYAN. See JERRY A. COYNE and BRYAN MILSTEAD
- MOORE, SANDRA D. Male-biased mortality in the butterfly *Euphydryas editha*: a novel cost of mate acquisition, 306
- MORRIS, MACDONALD, CARLO MATESSI, and SAMUEL KARLIN. Models of intergenerational kin altruism, 544
- NELSON, RANDY J. Photoperiod-nonresponsive morphs: a possible variable in microtine population-density fluctuations, 350
- ODELL, GARRETT. See PETER KAREIVA
- PACKER, CRAIG, and ANNE E. PUSEY. Intrasexual cooperation and the sex ratio in African lions, 636
- PALMER, JEFFREY D. Chloroplast DNA evolution and biosystematic uses of chloroplast DNA variation, S6
- PARTRIDGE, LINDA. See J. S. JONES
- PATTON, JAMES L., and PHILLIP V. BRYLSKI. Pocket gophers in alfalfa fields: causes and consequences of habitat-related body size variation, 493
- PERRY, JOE N. Host-parasitoid models of intermediate complexity, 955
- PLACE, ALLEN R. See ROBERT E. RICKLEFS et al.
- POST, W. M. See D. L. DEANGELIS
- PUSEY, ANNE E. See CRAIG PACKER
- RALIN, DENNIS B. See MICHAEL A. ROMANO
- RAUSHER, MARK D. See ELLEN L. SIMMS
- REAL, LESLIE. Objective benefit versus subjective perception in the theory of risk-sensitive foraging, 399
- REILLY, LINDA M. Measurements of inbreeding and average relatedness in a termite population, 339
- RICKLEFS, ROBERT E. See DAVID J. ANDERSON
- RICKLEFS, ROBERT E., ALLEN R. PLACE, and DAVID J. ANDERSON. An experimental investigation of the influence of diet quality on growth in Leach's storm-petrel, 300
- RITLAND, KERMIT, and MICHAEL T. CLEGG. Evolutionary analysis of plant DNA sequences, S74
- ROCKWELL, R. F., C. S. FINDLAY, and F. COOKE. Is there an optimal clutch size in snow geese? 839
- ROHWER, FRANK C. See TODD W. ARNOLD
- ROMANO, MICHAEL A., DENNIS B. RALIN, SHELDON I. GUTTMAN, and JOHN H. SKILLINGS. Parallel electromorph variation in the diploid-tetraploid gray tree-frog complex, 864
- ROTHSTEIN, STEPHEN I. See PAUL MASON
- RUTBERG, ALLEN T. Adaptive hypotheses of birth synchrony in ruminants: an interspecific test, 692
- SCHEMSKE, DOUGLAS W., and RUSSELL LANDE. On the evolution of plant mating systems: a reply to Waller, 804
- SCHWAGMEYER, P. L., KATHY ANN COGGINS, and TIMOTHY C. LAMEY. The effects of sperm competition on variability in male reproductive success: some preliminary analyses, 485
- SEDEROFF, R. R. Molecular mechanisms of mitochondrial-genome evolution in higher plants, S30
- SILVERTOWN, JONATHAN. Ecological stability: a test case, 807
- SIMBERLOFF, DANIEL. See NICHOLAS J. GOTELLI
- SIMMS, ELLEN L., and MARK D. RAUSHER. Costs and benefits of plant resistance to herbivory, 570
- SKILLINGS, JOHN H. See MICHAEL A. ROMANO
- SMITH, THOMAS. See MICHAEL HUSTON
- SMITH, WINSTON PAUL. Maternal defense in Columbian white-tailed deer: when is it worth it? 310
- SOLTIS, DOUGLAS E., and PAMELA S. SOLTIS. Polyploidy and breeding systems in homosporous Pteridophyta: a reevaluation, 219
- SOLTIS, PAMELA S. See DOUGLAS E. SOLTIS
- SPEAKMAN, J. R. Apparent absorption efficiencies for redshank (*Tringa totanus* L.) and oystercatcher (*Haematopus ostralegus* L.): implications for the predictions of optimal foraging models, 677
- SPENCER, HAMISH G., DAVID M. LAMBERT, and BRIAN H. MCARDLE. Reinforcement, species, and speciation: a reply to Butlin, 958
- STACEY, PETER B., and J. DAVID LIGON. Territory quality and dispersal options in the acorn woodpecker, and a challenge to the habitat-saturation model of cooperative breeding, 654

- STEPHENSON, A. G. See B. DEVLIN
- STOYAN, NINA C. See DAVID J. ANDERSON
- STRAUSS, STEVEN H., and WILLIAM J. LIBBY. Allozyme heterosis in radiata pine is poorly explained by overdominance, 879
- SUTHERLAND, JOHN P. See BRUCE A. MENGE
- TANKSLEY, STEVEN D. Organization of the nuclear genome in tomato and related diploid species, S46
- TEMME, DAVID H. See MARK A. MCGINLEY
- THORNHILL, RANDY. The relative importance of intra- and interspecific competition in scorpionfly mating systems, 711
- TOWNE, WILLIAM F. See JAMES L. GOULD
- WEINSHALL, DAPHNA. See ILAN ESHEL
- WEINSHALL, DAPHNA, and ILAN ESHEL. On the evolution of an optimal rate of sexual reproduction, 758
- WIKLUND, CHRISTER, BENGT KARLSSON, and JOHAN FORSBERG. Adaptive versus constraint explanations for egg-to-body size relationships in two butterfly families, 828
- WINKLER, DAVID W. A general model for parental care, 526

Alphabetical Table of Contents of Titles

- Adaptive hypotheses of birth synchrony in ruminants: an interspecific test. Allen T. Rutberg, 692
- Adaptive responses to accelerating costs of movement: a bioenergetic basis for the type-III functional response. Robert L. Dunbrack and Louis A. Giguère, 147
- Adaptive versus constraint explanations for egg-to-body size relationships in two butterfly families. Christer Wiklund, Bengt Karlsson, and Johan Forsberg, 828
- Allozyme heterosis in radiata pine is poorly explained by overdominance. Steven H. Strauss and William J. Libby, 879
- Alternative models of character displacement and niche shift. 2. Displacement when there is competition for a single resource. Peter A. Abrams, 271
- Antipredator behavior and the population dynamics of simple predator-prey systems. Anthony R. Ives and Andrew P. Dobson, 431
- Apparent absorption efficiencies for redshank (*Tringa totanus* L.) and oystercatcher (*Haematopus ostralegus* L.): implications for the predictions of optimal foraging models. J. R. Speakman, 677
- Bird consumption of bicolored fruit displays. Charles H. Janson, 788
- Cannibalistic egg-larva interactions in *Tribolium*: an explanation for the oscillations in population numbers. Alan Hastings and R. F. Costantino, 36
- Can vertebrate predators regulate their prey? A reply. N. A. C. Kidd and G. B. Lewis, 448
- Chloroplast DNA evolution and biosystematic uses of chloroplast DNA variation. Jeffrey D. Palmer, S6
- Community regulation: variation in disturbance, competition, and predation in relation to environmental stress and recruitment. Bruce A. Menge and John P. Sutherland, 730
- Competition and dormancy: a reanalysis and review. Stephen Ellner, 798
- Convergence to an evolutionarily stable strategy in the two-policy game. D. Bartholomew Brown and R. I. C. Hansell, 929
- Costs and benefits of plant resistance to herbivory. Ellen L. Simms and Mark D. Rausher, 570
- Crypsis, mimicry, and switching: the basic similarity of superficially different analyses. Thomas Getty, 793
- Crypsis versus mimicry and the color of shiny cowbird eggs. Paul Mason and Stephen I. Rothstein, 161
- The distribution and abundance of tallgrass prairie plants: a test of the core-satellite

- lite hypothesis. Nicholas J. Gotelli and Daniel Simberloff, 18
- Ecological stability: a test case. Jonathan Silvertown, 810
- The effects of sperm competition on variability in male reproductive success: some preliminary analyses. P. L. Schwagmeyer, Kathy Ann Coggins, and Timothy C. Lamey, 485
- Egg viability, nest predation, and the adaptive significance of clutch size in prairie ducks. Todd W. Arnold, Frank C. Rohwer, and Terry Armstrong, 643
- Environmental variance in lifetime mating success, mate choice, and sexual selection. Stephen P. Hubbell and Leslie K. Johnson, 91
- Estimation of the thermal niche of *Drosophila melanogaster* using a temperature-sensitive mutation. J. S. Jones, Jerry A. Coyne, and Linda Partridge, 83
- Evolutionary analysis of plant DNA sequences. Kermit Ritland and Michael T. Clegg, S74
- Evolution of species assemblages: effects of energetic constraints and species dynamics on the diversification of the North American avifauna. James H. Brown and Brian A. Maurer, 1
- Evolution of the dance language. James L. Gould and William F. Towne, 317
- An experimental investigation of the influence of diet quality on growth in Leach's storm-petrel. Robert E. Ricklefs, Allen R. Place, and David J. Anderson, 300
- Extinction thresholds in demographic models of territorial populations. Russell Lande, 624
- A general model for parental care. David W. Winkler, 526
- The generation of somatic and heritable variation in response to stress. C. A. Cullis, S62
- Host-parasitoid models of intermediate complexity. Joe N. Perry, 955
- Influence of alkaloids on feeding preference of eastern deciduous forest trees by the gypsy moth *Lymantria dispar*. Pedro Barbosa and Vera Aber Krischik, 53
- Intrasexual cooperation and the sex ratio in African lions. Craig Packer and Anne E. Pusey, 636
- Is nest parasitism among ducks advantageous to the host? Juan A. Amat, 454
- Is there an optimal clutch size in snow geese? R. F. Rockwell, C. S. Findlay, and F. Cooke, 839
- Long-distance migration of *Drosophila*. 3. Dispersal of *D. melanogaster* alleles from a Maryland orchard. Jerry A. Coyne and Bryan Milstead, 70
- The long-term pair bond of tropical house wrens: advantage or constraint? Leonard A. Freed, 507
- Male-biased mortality in the butterfly *Euphydryas editha*: a novel cost of mate acquisition. Sandra D. Moore, 306
- Male spacing systems in microtine rodents. Rolf Anker Ims, 475
- Maternal defense in Columbian white-tailed deer: when is it worth it? Winston Paul Smith, 310
- Measurements of inbreeding and average relatedness in a termite population. Linda M. Reilly, 339
- A method for analyzing selection in hierarchically structured populations. I. Lorraine Heisler and John Damuth, 582
- Models and mechanisms of frequency-dependent predation. Robert P. Gendron, 603
- Models of intergenerational kin altruism. Macdonald Morris, Carlo Matessi, and Samuel Karlin, 544
- Molecular mechanisms of mitochondrial-genome evolution in higher plants. R. R. Sederoff, S30
- Mosquito host choice and the epidemiology of malaria. Joel G. Kingsolver, 811
- Objective benefit versus subjective perception in the theory of risk-sensitive foraging. Leslie Real, 399
- On the evolution of an optimal rate of sexual reproduction. Daphna Weinshall and Ilan Eshel, 758
- On the evolution of plant mating systems: a reply to Waller. Douglas W. Schemske and Russell Lande, 804
- On the role of species in anagenesis. Douglas J. Futuyma, 465

- Organization of the nuclear genome in tomato and related diploid species. Steven D. Tanksley, S46
- The origin and function of intervening sequences in DNA: a review. W. Ford Doolittle, 915
- Parallel electromorph variation in the diploid-tetraploid gray treefrog complex. Michael A. Romano, Dennis B. Ralin, Sheldon I. Guttman, and John H. Skillings, 864
- Parental investment in offspring in variable environments: theoretical and empirical considerations. Mark A. McGinley, David H. Temme, and Monica A. Geber, 370
- Photoperiod-nonresponsive morphs: a possible variable in microtine population-density fluctuations. Randy J. Nelson, 350
- Plant succession: life history and competition. Michael Huston and Thomas Smith, 168
- Pocket gophers in alfalfa fields: causes and consequences of habitat-related body size variation. James L. Patton and Phillip V. Brylski, 493
- Polyploidy and breeding systems in homosporous Pteridophyta: a reevaluation. Douglas E. Soltis and Pamela S. Soltis, 219
- Preface [Supplement]. Michael T. Clegg, S1
- Prospective infanticide and protection of genetic paternity in tropical house wrens. Leonard A. Freed, 948
- The quantitative genetics of life history and fitness components in *Raphanus raphanistrum* L. (Brassicaceae): ecological and evolutionary consequences of seed-weight variation. Susan J. Mazer, 891
- Reinforcement, species, and speciation: a reply to Butlin. Hamish G. Spencer, David M. Lambert, and Brian H. McArdle, 958
- The relative importance of intra- and inter-specific competition in scorpionfly mating systems. Randy Thornhill, 711
- The relative rates of evolution of sex chromosomes and autosomes. B. Charlesworth, J. A. Coyne, and N. H. Barton, 113
- Reply to Commiato. D. L. DeAngelis, J. A. Kitchell, and W. M. Post, 458
- Sexual reproduction and viability of future offspring. Ilan Eshel and Daphna Weinshall, 775
- Sexual variations among plants of a perfect-flowered species. B. Devlin and A. G. Stephenson, 199
- Short-term apparent competition. Robert D. Holt and Burt P. Kotler, 412
- Species, speciation, and reinforcement. R. K. Butlin, 461
- Swarms of predators exhibit "preytaxis" if individual predators use area-restricted search. Peter Kareiva and Garrett Odell, 233
- Territory quality and dispersal options in the acorn woodpecker, and a challenge to the habitat-saturation model of cooperative breeding. Peter B. Stacey and J. David Ligon, 654
- A test of multilocus interaction in *Drosophila melanogaster*. Andrew G. Clark, 283
- Why are there no viviparous birds? A comment. David J. Anderson, Nina C. Stoyan, and Robert E. Ricklefs, 941
